# Innovate to future proof 2025

# RSA<sup>®</sup>Conference2019 Asia Pacific & Japan

Singapore | 16–18 July | Marina Bay Sands

SESSION ID: SEM-T02A

## Future of the CISO

**Kate Healy**

Principal Cybersecurity Strategist

**BETTER.**

#RSAC

**Now that we've got  
your attention...**

“ **Cyber security is  
an Enterprise-wide  
risk management  
issue, not just an IT  
issue** ”

**National Association of  
Corporate Directors**

**Governance,  
compliance and  
bears. Oh my!**

**Q: Have you been fined for being in breach of any new legislation enacted in the past 2 years?**

Unsecured  
webcams

# To Cyber Security Decision Makers: Do you have responsibility for decisions made for overall electronic security spend in your organisation?

 Yes, I make the final decision in my organisation

 Yes, I am one of the final decision makers in my organisation

 Yes, I contribute significantly to the decision

# What are the major challenges with regard to Cyber and Electronic Security Operations?

Source: Telstra Security Report 2019 – APAC Regional Summary

# What percentage of workload do you have in the cloud today? What percentage do you anticipate in two years?

Source: Telstra Security Report 2019

# Predictions

Top organisations will converge all security related functions and budget under the Chief Security Officer who will not necessarily be heavily technical and will likely have an MBA or similar

Security teams will take on a stronger Governance and Compliance responsibility, moving operational tasks into general IT

New technologies will continue to change the way we secure and the skills needed

# So what now

## 1. Ask yourself

- What are the regulatory requirements and industry standards that affect you?
- How will convergence change the way you operate?
- What are the new technologies ?
- Do you or your team have the right skills?
- Will your strategy meet the future needs of your business?

## 2. Put a plan in place to prepare for these changes
